THE HISTORY OF THE
CITY OF BOSTON
FROM 1630 TO 1800

The first settlement in Boston was made by a group of Puritan ministers and their families, who arrived in 1630. They were led by John Winthrop, who gave them the name of the "City upon a Hill." The settlement was founded on a small island in the harbor, and the first building was a church. The settlement grew rapidly, and by 1634 it had a population of about 100. The settlement was founded on a small island in the harbor, and the first building was a church. The settlement grew rapidly, and by 1634 it had a population of about 100.

THE UNIVERSITY OF CHICAGO
DEPARTMENT OF CHEMISTRY
RESEARCH REPORT

1. The first part of the report describes the experimental work carried out during the past year. The results of the experiments are presented in the form of tables and graphs. The data show that the reaction rate is proportional to the concentration of the reactants raised to the power of 1.5. This is in agreement with the theoretical prediction of the transition state theory.

2. The second part of the report discusses the theoretical aspects of the reaction. It is shown that the reaction proceeds via a transition state which is a five-membered ring. The energy of activation is calculated to be 15 kcal/mole. This value is in good agreement with the experimental value of 14 kcal/mole. The reaction is therefore considered to be a concerted process.

3. The third part of the report describes the physical properties of the reactants and products. The boiling points, melting points, and refractive indices are given. The infrared spectra of the reactants and products are also shown. The spectra show that the reactants are in equilibrium with their tautomers. The products are stable compounds.
